

ABSTRACT OF THE INVENTION

1
2 A multi-layered image transfer blanket and a method of
3 producing same, including a body portion and an image transfer
4 portion, the image transfer portion having an image transfer
5 surface and a back surface, comprising forming the image
6 transfer portion on a carrier substrate and transferring the
7 image transfer portion onto the body portion such that the
8 back surface of the image transfer portion faces the body
9 portion. Preferably, the image transfer portion is formed on
10 the carrier substrate such that the back surface of the image
11 transfer portion faces the carrier substrate.
